Item [REDACTED]

25X1

[REDACTED] The increase in the number of males (returning PWs, increase of births) between the census of 29 October 1946 and that of 30 September 1947 amounted to about 2.4 percent. The increase in the number of males between 30 September 1947 and 1 October 1949 was estimated at only 3 percent, since only a small number of PWs have been released since 30 September 1947 and the flow of Germans expelled from Poland has decreased.

Item [REDACTED]

25X1

[REDACTED] The percentage of males between 19 and 49 years of age in relation to the entire male population was estimated at 42 percent. The age group of 19 to 49-year-old males was chosen in accordance with the Soviet Military Service Law.

25X1

Item [REDACTED]

25X1

[REDACTED] The number of 19 to 49-year-old disabled males was estimated at roughly 80 percent of the total.

25X1

Item [REDACTED] The number of otherwise unfit persons was estimated at roughly 12 percent, since German war experiences proved this percentage to be the arithmetical mean between 6 percent for the 19-year-old and about 19 percent for the 49-year-old (exclusive of disabled).
